

Top 10 Challenges to Address in In-Center Hemodialysis Care

1	Timing, frequency, and amount of information being received should be individualized (specific to each patient)
2	Improve continuity of care in hemodialysis and info about a patient's care is complete in their chart
3	Improve the way information is communicated between health care providers and patients
4	It's frustrating for patients when they are told to see a family physician about health concerns they bring up in hemodialysis
5	More information and access to financial resources and support including availability of flexible, reliable and affordable transport to/from hemodialysis, housing and nutrition/diet.
6	More flexibility to change hemodialysis spots/schedule
7	Better information about the pros and cons of different dialysis modalities
8	More information about health risks and other conditions associated with hemodialysis
9	Better information about transplant status
10	More information and access to social programs for people on hemodialysis
